

### Flushmount Reducer

Coordinating appearance

92" X 0.709" X 2.244" (2336 mm X 18 mm X 57 mm)

This molding provides a smooth transition between floor coverings of different heights.

### Flushmount Stair Nose

Coordinating appearance

92" X 0.709" X 3.110" (2336 mm X 18 mm X 79 mm)

This molding is used to properly finish each step of a staircase and to enhance the beauty of a landing. It offers a beautiful finish because it is installed flush with the floor covering.

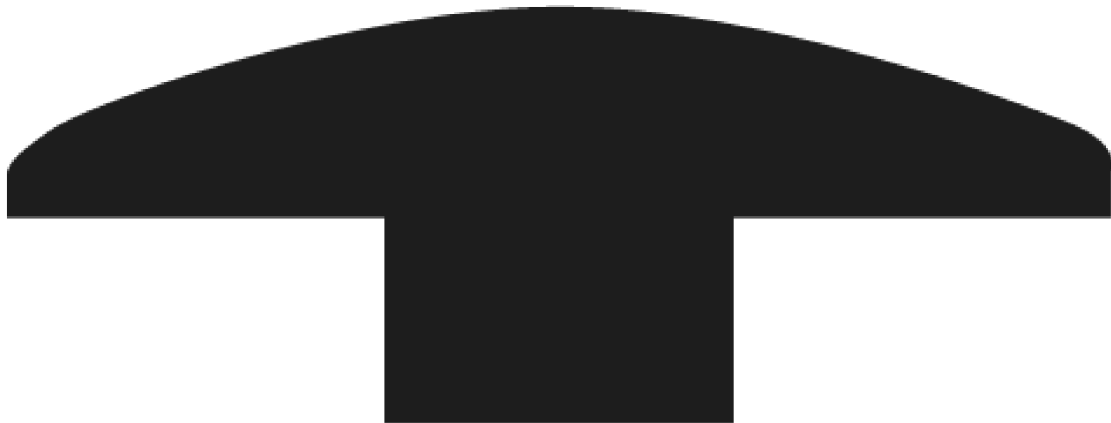

### Square Nose

Coordinating appearance

92" X 0.709" X 2.125" (2336 mm X 18 mm X 54 mm)

This molding made of wood, also called end cap, is designed to end a floor by covering the top and the side or for sharper transition between floor coverings of different heights.

### T-Molding

Coordinating appearance

92" X 0.709" X 2" (2336 mm X 18 mm X 51 mm)

This molding made of wood is used in doorways and entryways or for transition between floor coverings of the same height. Please refer to our installation guidelines for more information regarding the use of transition moldings.
